

# Clinical Research Training Center Opportunities

## Bench Fundamentals

This three-week intensive summer course introduces fellows-in-training and future physician scientists to the core principles of scientific investigation through a blend of theoretical knowledge and hands-on applications. Email us at [crtc@wustl.edu](mailto:crtc@wustl.edu) by July 1<sup>st</sup> to secure your spot! | [More information](#)

## Clinical Investigation

This 1–2-year program builds core competencies in clinical research and investigation through courses in study design, statistical methods, and scientific communication. Credits earned can later be applied toward the Certificate or Master of Science in Clinical Investigation. Enroll by August 1st! | [More information](#)

## TL1 Predoctoral Clinical Research Program

This program is committed to advancing your growth through mentored training, coursework, and peer collaboration. Join a community of early investigators and develop core skills in research ethics, study design, data analysis, and scientific communication. Applications open July 1, 2025! | [More information](#)

## TL1 Postdoctoral Training Program

Supported by the CTSA Program, our multidisciplinary approach provides postdoctoral trainees with the skills and knowledge needed to excel in research and make a significant impact on public health. Apply by September 1<sup>st</sup>! | [More information](#)

## KL2 Career Development Awards Program

The Clinical Research Training Center is currently seeking applications for the KL2 Career Development Awards Program, aimed at incoming or current junior faculty interested in clinical and translational research. This program provides financial support and infrastructure allowing scholars protected time to perform research and engage in formal didactic coursework. **This year, we are offering a dedicated slot for a junior faculty member conducting Public Health Research.** Apply by September 1<sup>st</sup>! | [More information](#)
